Team C (Story 2) Chris Wuester & Bryan Resner	<p>Summarized user T&amp;Cs</p> <p>Technical Tasks:</p> <ul style="list-style-type: none"> <li>-Create database to store expert summaries (1.5 cycles)</li> <li>-Create webpage for users/experts to interact with (form to submit opinions) (1 cycle)</li> <li>-Display multiple expert opinions/summaries to allow users to vote (1 cycle)</li> <li>-Incorporate library of specific terms and phrases for experts to select from (1 cycle)</li> </ul> <p>As</p>

4.

them to reference past projects for guidance. Because Chris W. was driving, with his screen shared,

Because testing databases is mostly done through integration testing, Team B wrote an additional

## Acceptance Testing

Between the pilot and co-pilot this almost would have been a spike there was thorough docs from web references to be able to accomplish the task without extending the story past the cycle.

At the start of the second XP cycle, Chris W. and Bryan had completed a database to store expert summaries, which they had expected to take 1.5 cycles. Several alterations were required, however, to
